

Metadata: Inverse texture effect review - 20260923

Rachel R. Renne, Yale School of the Environment

This document contains description of the queries used to create the list of reviewed literature and descriptions of the included tables of the list of sources used for the review.

Search queries

We conducted a search for relevant literature using Google Scholar in October 2024. We first tried a keyword search for “inverse texture”, but found many irrelevant citations from other fields, and so we focused our search using the original source (Noy-Meir 1973) and the first study to investigate the effect (Sala et al. 1988). We located each source on Google Scholar and found 4464 sources citing Noy-Meir (1973) and 1696 citing Sala et al. (1988). We identified relevant citations by searching within the “Cited by” list for keywords ‘inverse texture’ and ‘inverse-texture’.

Description of tables

ZoteroExport_Citing NoyMeir 1973 & Inverse texture_v2.csv

ZoteroExport_Citing Sala et al. 1988 & Inverse texture_v3.csv

We exported all citing sources of Noy-Meir (1973) or Sala et al. (1988) that included keywords “inverse texture” or “inverse-texture” from Google Scholar to Zotero, then exported the list of sources from Zotero to generate this file. These exported tables include many fields, but we only retained the subset that were relevant to our work. Those are described below.

Field name	Description
Item.Type	Type of record in Zotero
Publication.Year	Year of publication
Author	Authors
Title	Title of publication (article or chapter)
Publication.Title	Name of journal or book
DOI	Digital object identifier
Pages	Page numbers
Issue	Issue
Volume	Volume

CombinedZoteroExport_Citing_NoyMeir1973_Salaetal1988_v2.csv

This table combines all citing sources for both Noy-Meir (1973) and Sala et al. (1988) and is the output of the code file 01_Combining_ZoteroExports_v2.R.

Field name	Description
-------------------	--------------------

Item.Type	Type of record in Zotero
Publication.Year	Year of publication
Author	Authors
Title	Title of publication (article or chapter)
Publication.Title	Name of journal or book
DOI	Digital object identifier
Pages	Page numbers
Issue	Issue
Volume	Volume
Notes	Notes if a thesis or dissertation was later published as a journal article
Noymeir	Indicates if the source cites Noy-Meir (1973)
Salaetal	Indicates if the source cites Sala et al. (1988)

CombinedZoteroExport_Citing_NoyMeir1973_Salaetal1988_final.csv

This table combines all citing sources for both Noy-Meir (1973) and Sala et al. (1988), with notes and other data compiled during the literature review.

Field name	Description
Year	Year of publication
Author	Authors
Title	Title of publication (article or chapter)
Publication	Name of journal or book
DOI	Digital object identifier
Noymeir	Indicates if the source cites Noy-Meir (1973)
Salaetal	Indicates if the source cites Sala et al. (1988)
IntroductionOrReview	Inverse texture effect (ITE) mentioned in introduction or as part of literature review
Methods	ITE mentioned in methods section
Results	ITE mentioned in results section
Discussion	ITE mentioned in discussion section
Continent	Location of study
Approach	Type of study
Plant types	Plant types considered
Type	Type of publication
ITE Results	Results relevant to the ITE
ITE = Woody plants	Indicates if authors interpret ITE as only relevant to woody plants
Supports ITE	Indicates if results support ITE
Investigation	Indicates if the publication was an investigation of the ITE
